

HOW TO GET AROUND

Dublin City Centre is a much-improved environment thanks to the HGV management strategy, which has removed 90% of trucks from the city's streets. The removal of so many large trucks makes the city centre a more pleasant place to visit and easier to get around.

Dublin City Centre now has two LUAS (Tram) lines and much improved priority for buses, making the city centre even more accessible.

The end of 2009 will see the opening of the extension of Luas Line C1 down to the O2 and in early 2010 the Samuel Beckett Bridge will be open, this bridge will provide an important link on the outer orbital and provide a means for through traffic to bypass the city centre.

In the city centre the public transport priority scheme at College Green is now in operation making bus journeys easier and more reliable. Remember private cars can't use College Green, as a through route, Monday to Friday from 7 to 10 am and from 4 to 7 pm, but there are no restrictions outside these hours, and none at all on Saturdays and Sundays.

Access to all car parks in the city centre is maintained. Use this map to find your way to the different areas of the city.

This Symbol indicates that you are entering or on the Orbital Route System.

The samples below will give you an idea of how the signage system works:

J19

Ceanntar Shr. Anraí HENRY ST. AREA
