

# City Services Supporting Dublin Citizens Every Day

## EMERGENCY SERVICES

- Fire Brigade
- Ambulance
- Flooding
- Major Emergency
- Severe Weather
- 24 hour service

## WATER

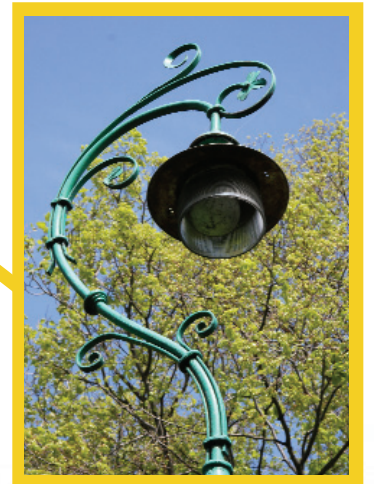

- Turning your tap on
- Water for firefighters
- Most demand on water during morning and evening - breakfast and dinner

## WASTE MANAGEMENT

- Clean roads/streets
- Bin collection
- Recycling
- 24 hour service

## PUBLIC LIGHTS

- Safely lit streets for pedestrians and vehicles
- Used from dusk to dawn

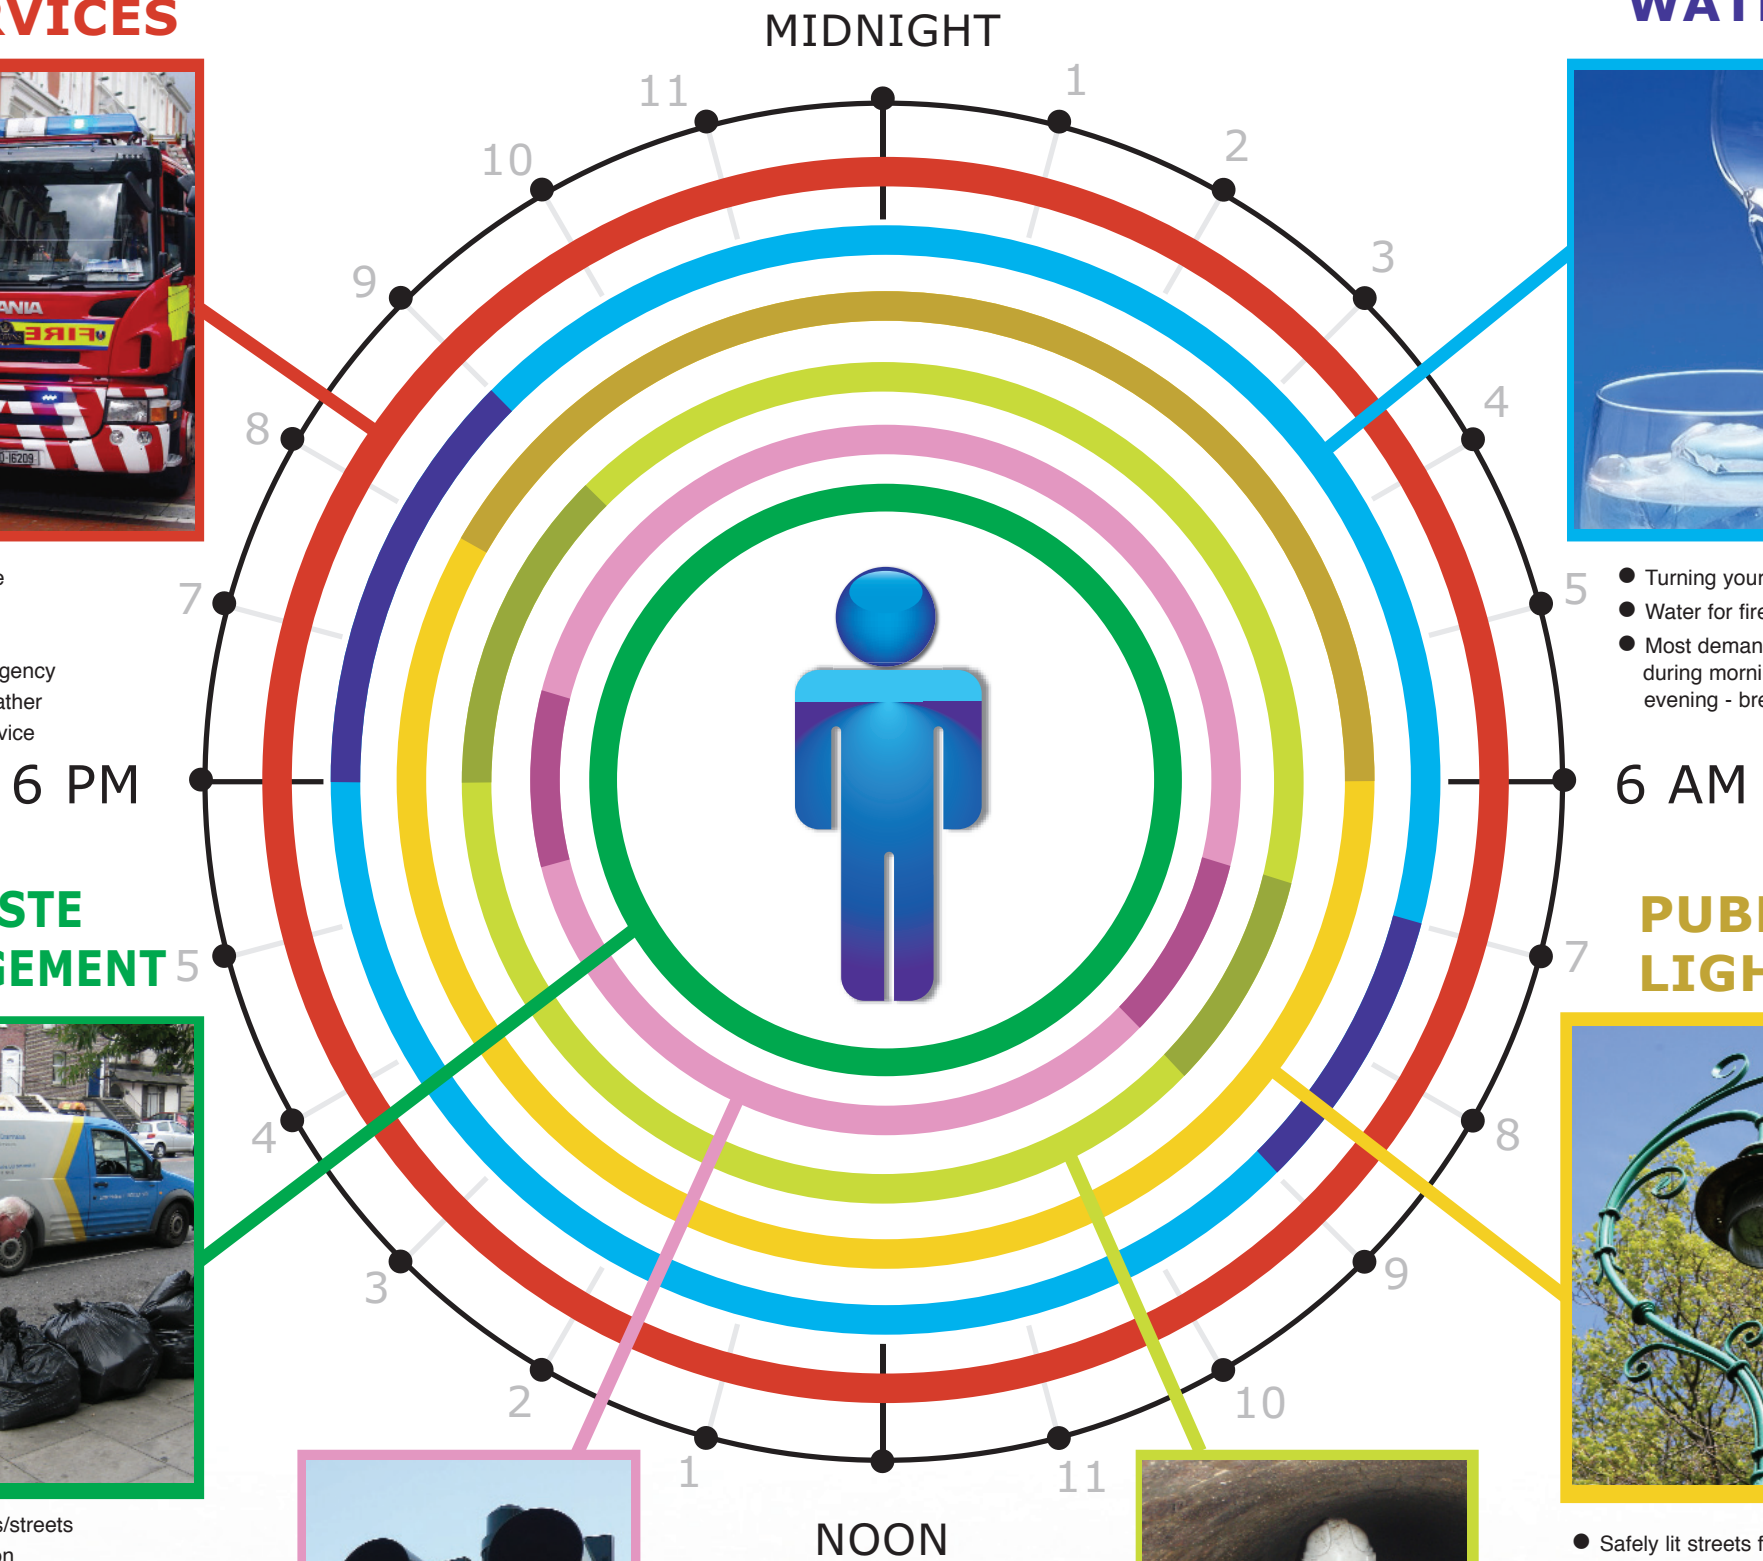

## ROADS & TRAFFIC

- Safe roads and streets for vehicles, bikes and pedestrians
- Organised traffic management
- Demand mainly during rush hours

## DRAINAGE

- Flushing the loo/washing
- During flooding
- Highest demand on the system is breakfast time and dinner

A Dublin citizen wakes up in the morning, bins were collected, the streets cleaned, turns on the light whose power comes from cables under the public road, turns on a tap for the morning ablutions, may use the toilet, drives along a public road to work, over a few bridges, passing through numerous managed and signalled junctions, may have a lunch break in a public park, walk along a footway, or use a cycle way. This procedure is reversed on the way home, where at night the public lights keep the streets lit and safe. Throughout the day a citizen may encounter one of our many emergency services (be it a blue light service or an orange light service) which operate 24/7. Air, noise and water pollution is also monitored, and where necessary measures are put into place to improve the environment. All these services are largely provided by the engineers and technicians of your Local Authority, and it is a good testament to all Dublin City Council staff that the operations of these services largely go unnoticed.
