Can the manager explain the sequence of events in relation to the discoloration of water in the North Central Area on the 3rd December?

Whose responsibility is it to ensure that public health is disseminated effectively. The advice, *"Once the sediment has been flushed out of the system the water will be safe to drink. The Principal Environmental Health Officer has advised as a precaution, not to consume the water, even if boiled, until it runs clear"*, implicitly is saying that the water on that evening was not safe to drink.

If so what was the response of Dublin City Council on this matter. It seems absurd that we can have an incident with the public water system and the response from the local authorities is to send an email to the elected representatives. Surely if the water was not safe to drink an emergency response public information strategy is automatically triggered into place?.

Order: Report to Councillor

3515. Motion in the name of Councillor Killian Forde

That the City Council re-examine ways that it can ensure that the funding provided to date to TARGET of Newbrook Road for its innovative Home Furnishing Course continues.

Order: Report to Councillor

3516. Motion in the name of Councillor Pat Crimmins

Can the Manager acknowledge the service of one Mr George Masterson who retired recently after working over 40 years in the Parks Department? George can be proud of the many tasks he participated in and one that comes to mind is the lovely row of trees he helped plant on the Tonlegee Road. We wish George all the best for the future.
