Dublin Fire Brigade keeping you safe

Fire Marshal

Course overview

The Fire Marshal's course is of one day duration and has been tailored to meet the requirements of both the 1981 Fire services act and Section 11(Emergencies & Serious Dangers) of the safety health and welfare at work act 2005. The course will take the students through a range of fire related topics covering emergency and non-emergency activities and duties, which the fire marshal would be expected to perform.

Who should attend?

Carefully selected members of staff who have been chosen to form a fire marshal team.

The team should consist of members of the work force drawn from all areas of the premises ensuring no area is left unrepresented. Allowance should be made for absenteeism due to leave etc.

Objectives

To give the students the knowledge and skills required to recognise and maintain a safe working environment. To effectively manage an evacuation in the event of an emergency. To deal with an out-break of fire in its early stages and to liaise with the Fire Brigade.

Key learning outcomes:

At the end of this session the student will:

- Have a greater knowledge of fire and its associate dangers and effects.
- Will be able to Identify and understand the function of common fire safety features and eliminate bad practise related to them.
- Understand the function and operation of Life Safety Systems i.e Fire Alarms & Emergency Lighting.

- Recognise potential fire hazards and take appropriate actions to rectify them.
- Recognise the different classes of fire and deal effectively with an outbreak.
- Understand the various models of evacuation and determine the best model for their workplace.

Duration

One day – 6 hours approx.

Programme

- The mechanics of fire, smoke and dangerous gases.
