Dublin Fire Brigade keeping you safe

Fire Safety Manager

Course overview

The Fire safety manager's course is of one day duration and has been tailored to meet the requirements of both the 1981 Fire services act and Section 11(Emergencies & Serious Dangers) of the safety health and welfare at work act 2005. The course will take the students through a range of fire safety related topics covering emergency and non-emergency activities and duties, which the fire safety manager would be expected to perform.

Who should attend?

Carefully selected member of staff who has been chosen to manage the fire safety of the company / premises. Allowance should be made for absenteeism due to leave etc. The appointment of a duty fire safety manager would be necessary.

Objectives

To give the students the knowledge and skills required to recognise and maintain a safe working environment. To effectively manage the company's fire safety obligations.

Key learning outcomes:

At the end of this session the student will:

- Be able to state the role of the fire safety manager.
- Have a greater knowledge of fire and its associate dangers and effects.
- Will be able to identify and understand the function of common fire safety features and eliminate bad practise related to them.
- Recognise potential fire hazards and take appropriate actions to rectify them.
- Recognise the different classes of fire.
- Understand the various models of evacuation and determine the best model for their workplace.
